The Congress Center Einstein is situated in the city center of St. Gallen, on the edge of the pedestrian area.

The design idea for the lighting of the Congress Center is a combination of an architectural analysis, the utilisation and the philosophy of the building owner. The most remarkable sights are the back-lit ceiling panels whose design was deduced from the Akris company's philosophy.

Client:  
Akris AG  
Architektur:  
HILMER & SATTLER und ALBRECHT Architects mbh  
Opening:  
September 2009
